

Netflix Movies & TV Shows — Insight Report

AnalystLab Africa Data Analytics Internship | Week 1–2

Prepared by: Sakiru Akinpelu

Date: May 2026

1. Dataset Overview

Metric	Value
Source	Kaggle — Netflix Movies and TV Shows Dataset
Total Titles	8,790
Movies	6,126 (69.7%)
TV Shows	2,664 (30.3%)
Unique Countries	749
Unique Ratings	14
Release Year Range	1925 – 2021
Date Range Added	January 2008 – September 2021

2. Data Cleaning Summary

Issue Identified	Action Taken
2,634 missing Director values	Filled with "Unknown" — director not always relevant
825 missing Cast values	Filled with "Unknown" — cast not always listed
831 missing Country values	Filled with "Unknown" — preserves row for analysis
10 missing Date Added values	Rows dropped — date needed for time analysis
4 missing Rating values	Rows dropped — rating needed for audience analysis
3 missing Duration values	Rows dropped — duration needed for content analysis
date_added stored as text	Converted to datetime format
type column had "Tv Show" casing	Corrected to "TV Show" using replace()
Inconsistent text formatting	Standardized using str.strip() and str.title()

3. Key Insights

Insight 1 — Movies Dominate Netflix Content

Movies make up nearly 70% of all content on Netflix (6,126 out of 8,790 titles). This shows Netflix's primary focus is film content, though TV Shows at 30% represent a significant and growing segment of the platform.

Insight 2 — The US Leads Content Production

The United States is by far the top content-producing country on Netflix, followed distantly by India and the UK. This reflects Hollywood's dominance in global entertainment and Netflix's American origins.

Insight 3 — Netflix Growth Peaked Around 2019

Content additions grew rapidly from 2015 and peaked around 2019. The visible drop in 2020–2021 likely reflects COVID-19's significant impact on global film and TV production schedules.

Insight 4 — Mature Content Dominates the Platform

TV-MA is the most common rating, followed by TV-14. This indicates Netflix primarily targets adult audiences. Family and children's content represents a smaller but still notable share of the library.

Insight 5 — Netflix Carries Nearly 100 Years of Entertainment History

With titles ranging from 1925 to 2021, Netflix offers both classic and contemporary content. This wide range suggests a deliberate strategy to appeal to diverse audience tastes and age groups.
